PROFESSIONAL SUMMARY

Developer with a degree in Systems Analysis and Development and experience building ERP software (C#/.NET, ASP.NET, Delphi, Oracle PL/SQL, Angular and TypeScript), full stack web applications (Angular, TypeScript and Python) and technical support. I resolve critical customer issues in the Billing, Sales, Inventory, Healthcare and Contracts modules, with hands-on experience in Brazilian tax rules, integration with the Federal Revenue Service (Receita Federal) and electronic invoice (NF-e) models. I also work with APIs, process automation and data analysis with Power BI.

PROFESSIONAL EXPERIENCE

.NET and Delphi Developer (Junior III) — MXM Sistemas

Jul 2025 – Present · Remote

- Develop and maintain the company's ERP with **C#/.NET, Delphi 7, Oracle PL/SQL and NHibernate**.
- Web development with **Angular and TypeScript** and with **ASP.NET and JavaScript**.
- Handle high-priority tickets in the **Billing, Sales, Inventory, Healthcare and Sales Contracts** modules.
- Resolve critical issues, including on-site customer visits to analyze complex cases.
- Work with tax rules, integration with the Brazilian Federal Revenue Service and electronic invoice (NF-e) models.
- Support the setup and drafting of sales contracts in the system.

3D Web Developer (Freelance) — STAM – Mobile Water Treatment System

Sep 2026 · Remote

- Built a 3D digital presentation of a solar-powered mobile reverse osmosis water treatment unit.
- 3D modeling and animation of the trailer, the treatment station and the industrial scene with **JavaScript, Three.js and WebGL**.
- Animated the full system operation, including raw, treated and reject water flowing through the pipes.
- Produced a presentation video and 4K images for commercial use; exported the model to glTF/GLB, SketchUp (DAE) and OBJ.
- Interactive website with a 3D viewer published on GitHub Pages: paulomatiasxvs.github.io/estacao-movel-de-agua

Junior Full Stack Developer — Flow Consulting

Feb 2025 – Sep 2025

- Built web interfaces with **Angular, TypeScript and JavaScript**.
- Developed back-end services and **Python APIs**, plus process automation scripts.
- Created dashboards and data analyses with **Power BI**.
- Worked as part of a team delivering scalable projects, from requirements gathering to deployment.

IT Support Technician — Fortaleza City Hall

Feb 2024 – Feb 2025

- Diagnosed and fixed hardware, software and network issues for internal users.
- Installed, maintained and updated systems and equipment.
- Assisted and guided public employees, gaining practical insight into technology challenges in the public sector.
